

# The CARE Program

## WHO IS IT FOR?

The Indiana Chapter of the American Academy of Pediatrics, with support from Indiana FSSA, is helping to address the mental health needs of children and adolescents throughout the state.

## WHY IS IT IMPORTANT?

The National Survey of Children's Health found that in the state of Indiana, 52.4% of children with a mental health or behavioral condition did not receive treatment or counseling in the years of 2019 and 2020.

## WHAT DOES IT DO?

The CARE Line was created to help primary care providers connect their patients and families to the mental health services they need.

## HOW DOES IT WORK?

Primary care providers can complete the referral for patients online by using the link below. You can also inform families that they are welcome to complete the client intake form themselves.
